EXPERIENCE

Northeastern University, Boston, MA Jul 2013 – Present
ResNet Technician
- Developed for the ResNet Dashboard using python and Django framework
- Resolved issues related to Northeastern's residential network
- Diagnosed and remediate software issues on student machines
- Provided customer service and represented the residential network at university events

Northwoods Software Corporation, Nashua, NH Jun 2013 – Aug 2013
Computer Science Intern
- Ported company's JavaScript library to java for use on Android
- Researched viability of converting company's GoJS tool into an Android diagramming library

PROJECTS

Pinyinify
A Google Chrome extension that replaces all Chinese characters in a webpage's DOM with their phonetically spelled-out equivalents to aid students learning Chinese.

Playlistr
An online playlist webapp developed along with four other Northeastern Students for HackBeanpot 2014. It's built with Node.js and uses both Youtube and SoundCloud API to query for songs.
